

Sense of Security is on the NSW Government ICT Services Approved Supplier Panel

Your choice of information security and risk management partner has never been more critical.

For more information ask to be emailed our longer company capability statement.

Contract 2020

Sense of Security is pleased to announce that we have been selected for the NSW Government ICT Services Approved Supplier Panel, Contract 2020. This groundbreaking new contract is the largest ICT services contract ever released to the NSW public sector.

Our inclusion in this panel is a reflection of the quality and integrity of the professional services that we provide. We have a solid track record of delivering information security and risk management services to local, state and federal government.

We are a leading independent provider of IT security and risk management solutions. Our team has expert skills in assessment and assurance, strategy and architecture, deployment to ongoing management.

We opened our doors in 2002 and are a wholly Australian owned private company. Our team is based in Sydney and Melbourne and has capabilities throughout Australia and Asia Pacific. Sense of Security is included in the 2008 ranking of the Deloitte Technology Fast 50, being Australia's fastest growing information security company.

Unique to this industry, we have both extensive business and security acumen, so solutions are designed to easily meld into current business operations and risk management strategies. Our information security advisory services are designed to provide clarity to executive management based on deep technical knowledge of the information security environment.
